

The Ideal Piano Footrest®

More productive lessons and practice, with better focus and less fatigue. For piano players whose feet don't rest firmly on the floor.

2017

Can't reach the floor

The floor came to her!

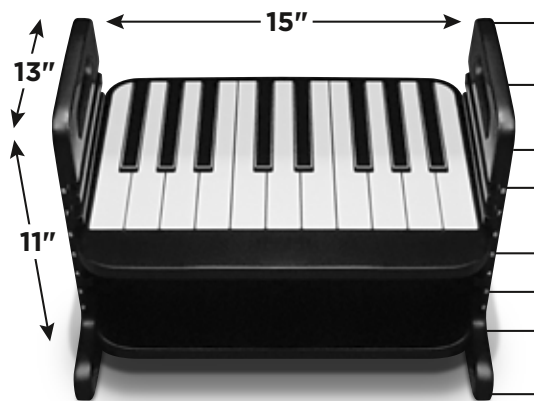

It's more difficult for students to play the piano with their feet dangling in the air. There's no leverage, and their backs get tired quickly. They often swing their feet out of time to the music.

With the Ideal Piano Footrest®, students have better posture, with less fatigue. They're more focused. Lessons are more productive and fun for the kids. And more fun for teachers too.

It looks beautiful by any piano. It's easy to adjust to the ideal height, and kids really like it. After a couple lessons, students don't want to play without it.

The white keyboard design is coated with a clear varnish for durability.

“After 20 years of teaching piano, I've finally created the ideal footrest for under the feet of my students.” Barb Gray

Quickly adjusts to 2, 3, 4, 5, 6, 7, or 8".

Shelf locks into place when centered.

Weight: 7 pounds

Material: solid wood and machine screws

Supports: 150+ pounds

Adhesive feet to protect your floor.

Keyboard graphic protected by clear varnish.

“I have been looking for something like this for years for my students. I have been using different size boxes filled with magazines! What a great design!”

Alice Finger

“It is easy to assemble, and adjusts to student heights. Very sturdy construction, and all the kids love it!”

Natalie Voogt

“We love the piano foot rest. It is sturdy, beautiful and I love the adjustability!”

Nicole Ouwenga-Scott
